IRONS AND OPTICS By Paul Howe IRONS FIRST - CSAT

Optics is the branch of physics that studies the behaviour and properties of light, including its interactions with matter and the construction of instruments that use or detect it. Optics usually describes the behaviour of visible, ultraviolet, and infrared light. Because light is an electromagnetic wave, other forms of electromagnetic radiation such as X-rays, microwaves, and radio waves ...

Optics - Wikipedia

The Leader in Optical Isolators for High Power Lasers. Electro-Optics Technology (EOT) has been supplying enabling components and diagnostic equipment worldwide for manufacturers and users of high power laser systems since 1987.

EOT - Electro-Optics Technology

Tiger Optics offers an array of trace moisture and other trace gas analyzers, as well as atmospheric and cleanroom monitors based on powerful and ultra-sensitive Cavity Ring-Down Spectroscopy (CRDS) for numerous markets & applications.

Tiger Optics: Cavity Ring-Down Spectroscopy Trace Gas

In optics, a caustic or caustic network is the envelope of light rays reflected or refracted by a curved surface or object, or the projection of that envelope of rays on another surface. The caustic is a curve or surface to which each of the light rays is tangent, defining a boundary of an envelope of rays as a curve of concentrated light. Therefore, in the adjacent image, the caustics can be ...

Caustic (optics) - Wikipedia

Beer-Lambert Law, more commonly known as Beer's Law, states that the optical absorbance of a chromophore in a transparent solvent varies linearly with both the sample cell pathlength and the chromophore concentration. Beer's Law is the simple solution to the more general description of Maxwell's far-field equations describing the interaction of light with matter.

Astronomical Refracting Telescope . The angle subtended by the object $\hat{\alpha}$ (alpha), is given by: . The angle subtended by the image $\hat{\beta}$ (beta), is given by: . Angular magnification M is by definition the ratio of $\hat{\beta}$ to $\hat{\alpha}$: . Substituting for $\hat{\alpha}$ (alpha) and $\hat{\beta}$ (beta) from above, . So for maximum magnification, a telescope requires a long objective focal length and a short eyepiece focal length.

Telescopes, Geometrical Optics - from A-level Physics Tutor

The Zeiss DC4 Camera-Eyepiece for Diascope spotting scopes is an all-in-one solution for digiscoping. It features a built-in 4 MP camera that takes standard batteries and has USB and video ports and an SD card, together with an eyepiece that magnifies to 30x on the Diascope 65 and to 40x on the Diascope 85.

WORLDTWITCH - Best Birding Binoculars & Spotting Scopes

Welcome to gw optics.org! These pages provide information and software related to gravitational wave detection, with a special focus on optics research. This page also hosts outreach material of the Gravitational Wave Group Birmingham, UK, supporting the efforts by GEO 600 and the LIGO Scientific Collaboration.

gwoptics: Tools for detecting gravitational waves

Vortex Observation Optics Catalog. Our world is an amazing thing; at Vortex Optics we want you to see every beautiful detail. Backed by years of experience in providing premium products for birders and naturalists, our optics have been put to the test.

Optics & Laser Technology aims to provide a vehicle for the publication of a broad range of high quality research and review papers in those fields of scientific and engineering research appertaining to the development and application of the technology of optics and lasers. Papers describing original work in these areas are submitted to rigorous refereeing prior to acceptance for publication.
