The Crystal River 3 Nuclear Power Plant, also called the Crystal River Nuclear Plant, or simply CR-3, is a closed nuclear power plant located in Crystal River, Florida. The facility is currently being decommissioned and is transitioning to a SAFSTOR condition. The power plant was completed and licensed to operate in December 1976, and operated safely for 33 years until shutdown in September 2009.

A crystal radio receiver, also called a crystal set, is a simple radio receiver, popular in the early days of radio. It uses only the power of the received radio signal to produce sound, needing no external power. It is named for its most important component, a crystal detector, originally made from a piece of crystalline mineral such as galena. This component is now called a diode.
