resulting in a pure textual stream, and that there has been a trend of corruption, resulting in a polluted textual stream. Yet, even in the various copies in the original languages of the pure stream, there is not an exact agreement in details. This disparity is only relatively minor, and is a sign that the Word, although present and available,

Pure risks are a family of risks in which all possible outcomes are harmful in some way. In other words a pure risk is a situation that can only end in a loss. For example, the risks of an accident, a car theft or earthquake are pure risks. Speculative risks on the other hand are a family of risks in which some possible outcomes are beneficial.

The aim of pure mathematics is to get beautiful results on paper by ignoring real life; the shorter and more compact the result, the better. Hence, pure mathematicians tend to look down on Applied Mathematics, with its three-foot-long equations trying to describe the movement of water down a bath plug, as a grovelling and
