According to tradition, the history of the Catholic Church begins with Jesus Christ and his teachings (c. 4 BC – c. AD 30) and the Catholic Church is a continuation of the early Christian community established by Jesus. The Church considers its bishops to be the successors to Jesus's apostles and the Church's leader, the Bishop of Rome (also known as the Pope) to be the sole successor to ...

Paraffin wax is a mixture of long alkane chains, the chemical formula for these molecules is $CH_3(CH_2)_nCH_3$, with n the number chains often some cyclo-paraffin and iso-paraffin are also part of the mixture .Its actual melting temperature depends on the chain length, the shorter the chain length, the higher its melting temperature, thus, a large range of melting points is available.

Phase-change materials (PCM) for automotive applications

Renewable energies are a key pillar of power sector decarbonisation. Due to the variability and uncertainty they add however, there is an increased need for energy storage.

On the possibility of extending the lifetime of lithium

Abstract: This paper discusses the possibility of extending the lifetime of lithium-ion batteries by using phase-change materials (PCMs) as thermal management solutions. The study focuses on the thermal stability and energy storage capabilities of PCMs in automotive applications. The results show that PCMs can effectively reduce the temperature fluctuations and extend the operational life of the batteries. The study also highlights the challenges associated with the integration of PCMs into battery systems and provides recommendations for further research and development.
