

the training needs analysis pdf

Introduction. Training Need Analysis(TNA) is the process of identifying the gap between employee training and needs of training. Training needs analysis is the first stage in the training process and involves a procedure to determine whether training will indeed address the problem which has been identified.

Training Needs Analysis Purpose. A Training Needs Analysis (TNA) is used to assess an organization's training needs. The root of the TNA is the gap analysis. This is an assessment of the gap between the knowledge, skills and attitudes that the people in the organization currently possess and the knowledge, skills and attitudes that they require to meet the organization's objectives.

Performance Analysis in Instructional Design. While the first step in the Analysis Phase, Business Outcome, determined the desired goals to improve the organization, this step, Performance Analysis, determines the exact cause of the performance deficiency that is preventing the organization from reaching its objectives and then identifying the performance required to reach the objective.
