Bed bugs are a type of insect that feed on human blood, usually at night. Their bites can result in a number of health effects including skin rashes, psychological effects and allergic symptoms. Bed bug bites may lead to skin changes ranging from invisible to prominent blisters. Symptoms may take between minutes to days to appear. Itchiness is common, while some may feel tired or have a fever.

Complexity characterises the behaviour of a system or model whose components interact in multiple ways and follow local rules, meaning there is no reasonable higher instruction to define the various possible interactions.. The term is generally used to characterize something with many parts where those parts interact with each other in multiple ways, culminating in a higher order of emergence ...
